Issue 68

Spring 2008

A communications link between you and your government, this publication intends to keep you informed about the “happenings” in your town.

Message from Town Hall

As you will learn in this newsletter, there is a lot of information available on surviving and coping with storms and their consequences. One critical aspect of storm response is successfully managing reentry after an evacuation has been called. Because there has been some confusion about reentry in the past, be sure to read the information below thoroughly.

The responsibility for ordering and managing a county-wide evacuation rests with the Dare County Control Group, consisting of the Dare County Chairman of the Board of Commissioners or his/her designee, the municipal mayors, the Superintendent of the Cape Hatteras National Seashore, and the Dare County Sheriff. A reentry process will be used by the Control Group to ensure an orderly reentry following an evacuation. The process is detailed below.

Dare County Reentry Priority Process

Priority One

Critical needs personnel identified by special permits issued by municipal mayors and the Chair of the Dare County Control Group. Essential personnel include utility, government, medical/healthcare, and hotel employees, and damage assessment teams. These permits have the following title on them: “Disaster Reentry Permit – Critical Personnel Pass”.

Priority Two

Permanent residents – resident property owners that have a reentry permit identified with an “R”, a Dare county driver’s license or a current Dare County tax receipt and critical service personnel as identified by the Dare County Control Group. Critical service personnel include employees in the following businesses: food service/supply, drug stores, banks, gas stations, property management, insurance, building supply, and local contractors/tree removal.

Message from Town Hall
Continued from page 1

Permits are needed for non-resident personnel of critical businesses ONLY since Dare County residents will also be allowed entry during Priority Two.

Priority Three

A non-resident improved property owner – identified by a solid color permit or a current Dare County tax receipt.

Priority Four

General public

Resident property owners are determined from the tax list and vehicle registration. Non-residents are determined by the tax listing. If you do not have a permit, you can use a valid North Carolina driver's license with a Dare county address or a current property tax receipt. No reentry stickers will be distributed after the evacuation order has been issued. After the storm has passed, damage assessment teams will provide information on the extent of damage to the Control Group. Depending on this report, decisions on who will be allowed back and when will be announced. No permits will be issued by Dare County 72 hours before a storm is expected to reach the area.

Call 1-877-629-4386 for reentry information after the storm.

Municipal Reentry

Sometimes, due to heavy storm damage occurring in a specific area, Dare County's municipalities may impose additional reentry limitations within their town limits. For example, if an area of Nags Head is particularly damaged as a result of a storm, a property owner may be able to reenter the county either through Kitty Hawk or through Manteo, but there may be additional reentry guidelines applicable to them once they arrive in Nags Head.

Sanitation Collection Schedule

Residential

East Route

Properties south of the intersection of Routes 12 and 1243 (Whalebone Junction) and all properties east of US 158/Croatan Highway

Summer Schedule (Begins 3rd Monday in May)
Monday, Wednesday, and Saturday
Collection begins 3 a.m.

Winter Schedule (Begins last Monday in September)
Monday and Friday, Collection begins 5 a.m.

West Route

Properties west of US 158 and those abutting/accessed from US 64 and 264

Same Schedule All Year

Collection: Tuesday and Friday
Collection begins 5 a.m. (winter) and 3 a.m. (summer)

Please roll out carts facing the street the day prior to collection day and back to the house on collection day.
Having a special event and need to rent extra carts?
Call Eddie Curry, Sanitation Superintendent, 252-449-4206.

Commercial

Summer Schedule (Begins 3rd Monday in May)
Monday, Wednesday, Friday, and Saturday
Refuse collection begins at 3 a.m.

Winter Schedule (Begins last Monday in September)
Monday and Friday
Refuse collection begins at 5 a.m.

Bulk Item/Brush Drop Off Yard

Large items/brush can be dropped off throughout the year at the Town's collection site across from Public Works at 2200 Lark Avenue. Site hours are: Tuesday and Thursday 8 a.m. - 4 p.m. and Saturday 9 a.m. - 1 p.m.

Hurricanes, Winter Storms, Erosion, and Flooding

What You Need to Know as a Nags Head Property Owner

A number of characteristics make Nags Head a sought-after place to live or vacation. Chief among these is the Town's proximity to water and beaches. A recreational wonderland, Nags Head is closely tied to its natural environment. As a result, we must be prepared for what the natural environment can bring.

The greatest threats come from hurricanes, winter storms, and seasonal high tides. Nags Head is a barrier island bordered by the Atlantic Ocean and the Roanoke Sound, making us vulnerable to flooding. Previous storms (such as the 1991 Halloween Storm, the March 1993 storm, and Hurricane Isabel in 2003) have caused either ocean overwash or flooding from the sound. The areas flooded by these storms include much of south Nags Head as well as areas between Jockey's Ridge State Park and Whalebone Junction.

Storm Preparation Reduces the Loss of Lives and Property

Storms, hurricanes, flood warnings, and impending dangerous conditions, as well as evacuation procedures, are broadcast to the public by Internet, radio, television, local emergency agencies, and NOAA weather radio. The warning messages may include information regarding the expected degree of flooding or storm surge, the affected bodies of water, where and when flooding is expected to begin, and the expected maximum water level during

Debris-riddled overwash from 2003's Hurricane Isabel made the Whalebone Junction area dangerous for people and vehicle tires.

flooding. Warnings are also transmitted through Early Alert System (EAS) radio. For this area, the primary EAS station is WRSF (105.7 FM) in Columbia. In addition, other local radio stations and local Government Access cable channel 20 may provide important information and warning messages.

Continued on page 4

Evacuation

The decision to evacuate is a primary function of the Dare County Control Group. This group is composed of the mayors of each of the six municipalities, the Dare County Board Chairman or his/her designee, the National Park Service Superintendent, and the Dare County Sheriff. The overall goal is for evacuating vehicles to leave with sufficient time before the arrival of 34 knot (almost 40 mph) winds. Evacuation decisions will be broadcast over local radio stations. In the vicinity of the Wright Memorial Bridge, weather and storm information is available on 1610 AM.

If an evacuation is called, you should leave the area in sufficient time to avoid traffic congestion. There are two primary routes for evacuation: US 64/264 across the Virginia Dare bridge and onto the mainland, and north on US 158, across the Wright Memorial Bridge to Currituck County. Both routes are marked with Evacuation Route signs.

If You Do Not Evacuate

- Call the Town at 252-449-2018 if you intend to remain during an evacuation.
- Monitor the media for the latest instructions.
- Stay inside and away from doors and windows. Do not go outside in the brief calm during passage of the storm's eye. Ocean and sound waters can rise quickly, so do not venture outside.

Continued on page 4

Evacuation
Continued from page 3

If You Evacuate

- Know where you are going. Leave early and in daylight, if possible.
- If you go to a shelter (there are no shelters in Dare County), take personal items, special dietary needs, infant foods, etc.
- Turn off as many utilities as you can safely. Do not touch electrical equipment unless it is in a dry area, or if you are standing on a piece of dry wood while wearing rubber-soled shoes or boots and rubber gloves.

If conditions warrant, water and electrical service to your home or business may be discontinued, especially if your property is in a particularly vulnerable area.

Hurricane watch - a hurricane may threaten within 36 hours.

Hurricane warning - a hurricane is expected to strike within 24 hours.

Hurricanes, Winter Storms, Erosion, and Flooding
Continued from page 3

Before the Storm

- Check your flood insurance policy or contact a Nags Head building inspector to learn in which flood zone your property is located. The building inspector may also be able to tell you: the elevation of your home, whether your home is in a special hazard area, the base flood zone elevation, and if your home is subject to storm surge.
- List your personal property for insurance purposes.
- Review your insurance policy and take advantage of flood insurance.
- Monitor storm reports on radio and TV and plan your evacuation early.
- Learn the location of the nearest inland shelter. (Due to the potential for flooding, there are no public shelters in Dare County.)
- Check transistor radios and flashlights for batteries.
- Know how to use candles, matches, and lamps safely.
- Ensure that your vehicle has a full tank of gas.
- Keep money on hand for emergencies in case ATM's become inoperable.
- Maintain a 7 day supply of needed medicine.
- Store packaged food and canned goods in the event there is no electricity.
- Fill clean containers with drinking water—enough for several days.
- Fill bathtubs with water to use for flushing toilets.
- Have shutters and lumber available for protecting doors and windows.
- If you live in a mobile home, plan to evacuate.

Hurricanes are large, powerful storms that can suddenly change direction. Check frequently on the storm's progress.

When a Hurricane Warning is Issued

- Listen to radio or TV for directions and weather advisories.
- Anchor or move loose outside objects such as garbage cans and lawn furniture inside your home.
- Board up or shutter large windows to reduce shattering.
- Store valuable and personal papers in a safe, waterproof location.

After the Storm

- If you have evacuated, return only when advised by local officials.
- Beware of outdoor hazards such as glass, nails, and loose or dangling power lines, etc.
- Guard against spoiled food and do not use water until notified that it is safe.
- Take extra precaution to prevent fire.

Important Flood Insurance Information

Your property may be located in a flood zone (new flood insurance rate maps were adopted for Nags Head on September 20, 2006). Upon request, Nags Head will provide information regarding whether your property is located in a special flood hazard area and the history of flooding in that area, as well as any other information on the Flood Insurance Rate Map (FIRM). Additional information that can be provided includes:

- The community number, the panel number and suffix, and the date of the FIRM's index.
- The FIRM zone, e.g., X, VE, AE, etc. along with the base flood

elevation (estimated height of the 100 year flood) and the elevation datum used on the FIRM, if other than the North American Vertical Datum.

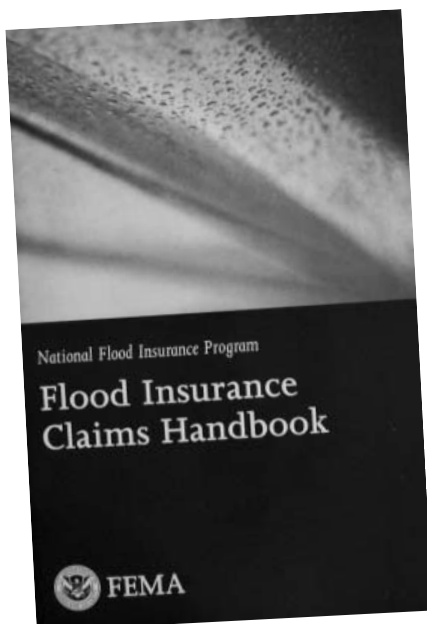

If you would like to make an inquiry, please have the following information available regarding the property: (1) Street address; (2) subdivision, block, and lot number, and (3) PIN (**P**roperty **I**dentification **N**umber) from your tax records. To request information from FIRM maps, please call the Nags Head Planning and Development Department at 252-441-7016.

Should you need to obtain flood insurance, the Town participates in the federal government's National Flood Insurance Program, which makes flood insurance available to Nags Head property owners. Please be aware that properties located within the Town's corporate limits that are subject to federally supported mortgages are required to be protected with flood insurance. Owners of properties free of encumbrances should also strongly consider having this valuable protection. It is important to know that a standard homeowner's policy does not cover flood losses. For more information on flood insurance, visit the Federal

Emergency Management Agency (FEMA) web site, www.fema.gov or consult your local insurance agent or broker.

Finally, Nags Head is working to reduce flood losses, ensure accurate insurance ratings, and promote the awareness of flood insurance through its participation in the National Flood Insurance Community Rating System (CRS). As a participant in the CRS, flood insurance premiums have been reduced by 20% , which results in a savings of more than \$248,000 to policy holders in Nags Head who have property in Special Flood Hazard Areas.

In Nags Head there are two Special Flood Hazard Areas, the AE flood zone and the VE flood zone. The VE flood zone includes most properties east of NC 12 and SR 1243 and the AE zone, sometimes called the 100-year flood zone, includes other areas in the Town subject to flooding either from the sound or the ocean. For more information, contact the Town's Planning and Development Department. Part of the Town's commitment to this program is that we must increase public awareness and safety by informing residents of flood hazards and what they can do to reduce property losses and human suffering.

Hurricanes, Winter Storms, Erosion, and Flooding

Floodplains

Development within a floodplain or flood zone may be subject to additional standards and permits to prevent flood losses. In addition to special construction techniques, special elevation regulations may apply. In most cases, permits may be required, so please contact a Building Inspector prior to any landscaping activity, building, filling, or redevelopment project. Report any suspicious floodplain development to the building inspectors at 252-441-7016.

Natural and Beneficial Floodplain Functions

Natural Flood and Erosion Control

Floodplains provide flood storage and conveyance of floodwaters, reduce flood flow, and control erosion of beachfront structures.

Maximum Flood Insurance Coverage Available

	Building	Contents
Single Family Dwelling	\$250,000	\$100,000
Other Residential	\$250,000	\$100,000
Non-Residential	\$500,000	\$500,000
Small Business	\$500,000	\$500,000

Water Quality

Floodplains filter nutrients and impurities from runoff.

Ground Water Recharge

Floodplains reduce frequency and duration of surface runoff flows.

Biological Resources

Floodplains support a high rate of plant growth, provide breeding and feeding areas, and enhances waterfowl habitat.

Societal Resources

Floodplains provide open space, recreation, and aesthetic resources.

The Nags Head Code of Ordinances protecting the natural and beneficial functions of our floodplains are: Protection of Sand Dunes-Section 8-3; Operation of Motor Vehicles on the Beaches-Section 8-61 to 8-63 and 8-81 to 8-86; Soil Erosion and Sedimentation Control Ordinance-Section 28-1 to 28-22; Flood Damage Protection Ordinance-Section 22-31 to 22-36; CAMA regulations-by contract with the State.

Retrofitting

Retrofitting minimizes flood damage to homes. There are many ways to accomplish this, though they are normally incorporated into the initial design of the house. However, there are also many steps that can be taken to minimize or eliminate the potential for flood damage to an existing home. Examples of retrofitting include elevating your house on pilings, or in extreme cases, relocating the house to a safer location. Another retrofitting measure includes elevating and attaching the outside heating and cooling units to the side of your house, above projected flood levels.

For Additional Storm Information:

- Contact Dare County at 1-877-629-4386 for general hurricane related information or visit their web site at www.co.dare.nc.us.
- Contact Nags Head Planning and Development at 252-441-7016 for planning-related issues.
- Read the introductory pages of the latest editions of the local telephone books for important evacuation tips.
- Watch Dare County's Local Government Access Channel 20 on local cable TV.
- Check out the Federal Emergency Management Agency (FEMA) web site (www.fema.gov) for comprehensive emergency preparedness and recovery information.
- Visit www.readync.org for North Carolina disaster preparedness information.

Continued on page 7

Hurricanes, Winter Storms, Erosion, and Flooding

To find out more about retrofitting, please contact our building inspectors. They can visit your home, review your plan, and offer suggestions.

Help Maintain Drainage Ditches

Maintenance of the Town's drainage ditches is an important flood prevention measure. Debris clogged ditches can be a potential hazard during a storm, disrupting stormwater flow. It is illegal to dump any material, debris, etc., into a stream or ditch. Should you see this, please call Nags Head Public Works Department at 252-441-1122

Flooding, Drainage, or Sewage Problems?

The Town will provide on-site advice concerning flooding, drainage, and sewage problems. Call the Planning and Development Department at 252-441-7016 for more information.

Nags Head Finance Officer Kim Kenny Receives Prestigious State Certification

The North Carolina Public Finance Officers Association and the North Carolina Association of County Finance Officers has awarded Nags Head's Finance Officer Kim Kenny the prestigious Local Governmental Finance Officer certification. She is only one of two in Dare County who hold this certification.

The voluntary certification program, in place since 1985, proposes to:

- Provide greater service to the public and the management of local government,
- recognize achievement of an established level of competency and proficiency among finance officers,
- promote continuing professional

development of finance officers, and

- enhance their professional image.

Those meeting the program's standards of experience, education, and examination, become Certified Local Governmental Finance Officers.

The certification examination, given twice a year, consists of four parts, which cover, at length, governmental accounting, cash management and investments, financial planning and budgeting, and financial management. Though many finance officers take only one part of the exam at a time, Ms. Kenny completed and

Finance Officer Kim Kenny stands with her son Zach and husband John after receiving recognition from the Board of Commissioners for her Local Governmental Finance Officer certification.

passed all four parts over two days in May 2007.

Ms. Kenny, employed by the Town for the last 17 years, holds a Bachelor of Science degree from Lehigh University in Pennsylvania and is a Certified Public Accountant. She lives in Kill Devil Hills with her husband, John, and their four children.

New Employee Spotlight

Cliff Ogburn

Many of you may already be familiar with Cliff Ogburn, the Town's new Deputy Town Manager. Since 2001 he has served as Dare County's Public Services Director, managing Parks and Recreation among his other duties. Prior to Dare County, Cliff worked as Edenton, North Carolina's Parks and Recreation Director. Needless to say, Cliff knows our community well. As a Nags Head resident who has actively participated on Town

committees and boards, he already understands our community's needs and goals.

Cliff replaces Bill Richardson, who has graciously and successfully served as Nags Head's Interim Deputy Manager since October 2006.

Deputy Town Manager Cliff Ogburn, right, speaks to Nags Head Fire Chief Butch Osborne about the Town's compliance with the federally-mandated National Incident Management System.

News

Pay Your Property Taxes Early (in July or August) ~ Get a 1% Discount

A 1% discount for prepayment of property taxes will be granted on payments received during the months of July and August preceding the first day of September, the due date for payment of taxes. Call the Town of Nags Head at 252-441-5508 if you have questions.

New Visitor Tips Magnets Are In

Nags Head is offering magnets with Town information on them to all property owners to post in their homes or businesses. The magnets include basic information about Nags Head such as fireworks laws, garbage collection information, and surviving a rip current. Stop by Town Hall or call Roberta Thuman (252-441-5508 or thuman@townofnagshead.net) to have a magnet mailed to you.

Volunteer Firefighters Wanted

Being a Volunteer Firefighter offers rewards few other positions can match. Where else will you have the opportunity to save a life or a neighbor's home? In addition to firefighting, help is also needed to keep records, maintain traffic control, and support responders during emergency operations.

"We are thrilled Cliff has accepted the position of Deputy Town Manager," explained Nags Head Town Manager Charlie Cameron. "Through Cliff's service to our community, we are already familiar with Cliff's many skills as a leader and team builder. Those talents, combined with his 9 years of local government experience, make for a perfect fit for both the Town and for Cliff."

A graduate of East Carolina University, Mr. Ogburn holds a Master of Arts in Education. He lives in Nags Head with his wife, Joy, and their two daughters.

Fire Safety Tips for Barbecue Grills

Outdoor cooking can be an enjoyable summer family experience; however danger may be present if BBQ grills are used improperly. These BBQ safety tips can help keep outdoor cooking a safe and trouble free experience.

- Read all manufacturers instructions before using the grill. Observe all safety and operational instructions.
- Ensure LP gas tanks are secured tightly to the regulator hose fitting and grill carriage before lighting the unit.
- Never store liquid propane containers in the house or garage. Store outside, secured and in an upright position.
- Do not smoke while handling propane cylinders
- Store all grill lighting fluids away from ignition sources.
- Clean grill thoroughly before and after use. This will avoid grease buildup that can cause flare-ups and/or fire.
- Use all grills outdoors. Keep all grilling activities at least ten feet away from buildings, houses, tents & garages.
- When lighting your grill, make sure the grill top is open.
- **NEVER put lighter fluid directly on flames!!!!**
- Have a multipurpose ABC Fire Extinguisher nearby.
- If a grill fire becomes uncontrolled, or fire involves the tank, immediately evacuate the area and call 911. If you can do so **safely**, attempt to extinguish the fire from at least ten feet away. Use the fire extinguisher agent deployed at the base of the fire. Remember, items can be replaced, but you cannot!
- Keep all children and pets away from the grilling area (at least 5 feet in all directions).
- Never leave cooking unattended for any reason.
- When simmering foods on accessory burners, keep pot handles turned inward.
- Use only starter fluids recommended for charcoal grilling.
- Dispose of extinguished charcoal properly in a metal container dowsed with water. Do not place used charcoal in trash cans!

**Don't Forget -
ALL Fireworks in Nags
Head are
Banned**

Town Birthday Celebration

Town Birthday Celebration

June 14, 2008, 11 a.m. at Town Hall - please monitor
www.townofnagshead.net or call the Town
(252-441-5508) for more information.

If you have any questions about safe outdoor cooking, call Nags Head Fire Rescue at 252-441-5909.

Septic Tank Inspection and Pumping Program

The Town contracts with independent inspectors to perform free septic system inspections for property owners who have conventional on-site septic systems (This program is contingent upon Fiscal Year 2008-2009 funding and runs July through May each year) . You should contact the Town at 252-449-6047 or email Todd Krafft at krafft@townofnagshead.net for an inspection. The Town will contact you with the inspection results and let you know if your tank requires pumping. There is no cost for the septic inspection.

Septic Tank Pumping

If your inspection indicates a need for tank pumping, you can contact a firm of your choice and then provide the Town with a copy of a paid invoice for the pumping to receive a \$30 water credit.

Repair/Replacement Loan Program

Repairing and/or replacing septic systems has increased in cost substantially over the past few years. To assist homeowners in septic tank repair/replacement, loans are now available through the Town. The maximum amount of the loans has increased to five thousand dollars. Loan interest rates are set with a local bank and are based on the daily prime interest rate less 2.5% at the time a loan is processed with the Town.

Call 252-449-6047 for a free inspection or more information.

Message from Town Hall

Continued from page 2

While the Town doesn't like to enact additional reentry limitations, sometimes ensuring public safety requires it. For instance, a heavily damaged area may be unsafe for entry due to live electric wires or unsanitary conditions as a result of septic tank contamination. The Town carefully considers reentry options and acts accordingly. Should the Town need to impose reentry regulations that differ from the County's rules, the regulations will be disseminated throughout local and regional media, in addition to being posted on the Town's web site.

Should you have questions about reentry into Nags Head, please call Town Hall at 252-441-5508 or visit the Town's web site at www.townofnagshead.net.

Town Meeting Calendar

Agendas for Board of Commissioners meetings are published in advance in *The Coastland Times*. All meetings will be held in the Board Room unless otherwise specified. Agenda and background material for the Board of Commissioners meetings can be found on the Town's web site at www.townofnagshead.net.

<u>Meeting</u>	<u>Dates</u>	<u>Times</u>
Daytime		
Board of Commissioners	June 4, July 2, August 6	9:00 a.m.
Board of Adjustments (meets as necessary)	June 12, July 10, August 14	9:00 a.m.
Nighttime		
Board of Commissioners*	June 18, August 20	7:30 p.m.
Planning Board	June 17, July 15, August 19	7:30 p.m.
Community Watch Meeting	June 10, July 8, August 5**	7:00 p.m.

*Adjourned session meetings of the Board of Commissioners are held as necessary. Check newspaper listings, call Town Hall at 252-441-5508, or check the Town web site for more information.

** The August Community Watch Meeting is a National Night Out community barbecue.

The Citizens Advisory Committee and Personnel Grievance Panel meet as needed.

Visit the Town web site for current meeting information.
